The smart container for hygienic disposal

MGB round

MGB eco

MGB s

FUTURE SOLUTIONS TODAY.

MGB round

MGB eco

Spherical base

Complete emptying
Self-cleaning effect from torque while pouring

Wheel/axle

Smoothly running wheels with full rubber tyres
Quick wheel change and simple stacking of containers
Corrosion-resistant, impact-resistant axle of tempered steel, galvanised

Quality

Produced in the EU
ISO9001:2015, IATF16949:2016 (automotive standard), ISO14001:2015, EN 840
Low-noise by default (MGBround120: LWA89; MGBround 240: LWA91)

Waste disposal newly defined

Made from environmentally compatible materials, transport-optimised, long-lived, and robust thanks to reinforced bottom and side walls, the MGBround merges innovative design with practical function. Ergonomically shaped, the container is easy to manoeuvre in a healthy and upright posture. Its spherical base and conical shape permit a self-cleaning effect through the waste torque while pouring. This reduces costs from speeding up emptying by up to 20 % and optimising hygienic waste disposal.

MGB S

Ergonomics

Optimised centre of gravity (easy to tilt while empty or full)
Ergonomic grip tube, asymmetrical handle for one-handed operation

Robust

Stable comb strip by double angle bar and reinforcement ribs
Stable in the bottom and side areas
Extremely heat, cold, and UV resilient

Food residue disposal

Since MGBround containers are particularly stable and easy to clean, they are outstandingly suitable for collecting food waste. Our BigFoot wheels are perfect supplements for this.

For the environment

Our MGBround merges efficiency, function, and environmental compatibility. It simplifies waste disposal while protecting the environment by environmentally compatible materials and optimised emptying processes. At the same time, it promotes employee health with its ergonomic shape.
